Appian Recognized as a Leader in the 2025 Gartner® Magic Quadrant™ for Enterprise Low-Code Application Platforms

July 30, 2025

MCLEAN, Va., July 30, 2025 /PRNewswire/ -- Appian (Nasdaq: APPN) the leading platform for AI process automation, today announced it has been recognized as a Leader in the Gartner® Magic Quadrant ™for Enterprise Low-Code Application Platforms (LCAP) report for the third consecutive year.

We believe this recognition showcases Appian's unique ability to unify complex business processes in a single platform—offering complete control and visibility with the power of AI and the speed of low-code.

Low-code application platforms (LCAPs) empower organizations to rapidly develop and deploy custom applications. By replacing traditional hand-coding with visual interfaces, AI assistance, and libraries of reusable components, teams can build and launch solutions in a fraction of the time.

For midsize and large organizations requiring robust solutions, enterprise LCAPs provide the power needed for mission-critical systems. These platforms are engineered for the entire application lifecycle, enabling professional developers and business technologists alike to build sophisticated applications without sacrificing the security, scalability, and performance that enterprises demand.

"The true differentiator for enterprises will be their ability to intelligently orchestrate AI within their business processes," said Sanat Joshi, Executive Vice President, Product & Solutions Appian. "Appian empowers our customers to achieve this quickly by unifying data, people, and AI within a powerful low-code process automation platform."

Gartner® recognizes Appian for our customer experience, platform operations, and geographic strategy.

Earlier this year, Appian was also named a Customers' Choice in the 2025 Gartner® Peer Insights Voice of the Customer for Enterprise LCAP, receiving a 99% *willingness to recommend* score (based on 52 reviews of 31 Jan 2025).
